Your Winter Home Checklist

Taking a few simple steps before winter arrives can help prevent breakdowns, reduce energy costs and keep your home warm and safe.

the BIG WINTER WARM UP

☐	Test smoke alarms and carbon monoxide alarms
☐	Bleed radiators if they're cold at the top
☐	Check boiler pressure is between 1 and 1.5 bar
☐	Find your stop tap and learn how to turn off your water supply
☐	Clear air vents and extractor fans
☐	Keep your home ventilated to prevent damp and mould or condensation
☐	Check windows and doors for draughts
☐	Move furniture away from radiators and do not dry clothes on them
☐	Keep a torch and spare batteries handy
☐	Save important contact numbers in your phone
☐	Keep an emergency supply of blankets, medication and essential items
☐	Sign up for your energy supplier's Priority Services Register if you're eligible

Remember: small checks now can help you avoid bigger problems when winter weather arrives
